

PEAK₄₂

BYOD (Bring Your Own Device)
Secure Plant information anywhere

Benefits

Access the key information you need, anytime, anywhere, and from your own device.

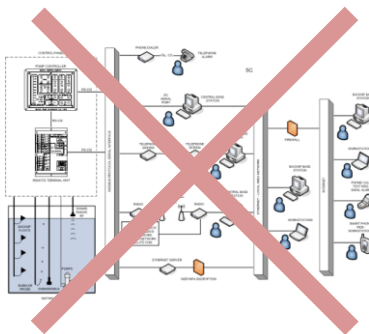

- No laptop to boot
- No VPN to log onto and complex webpage
- No expensive infrastructure
- Zero security threat
- No software license costs

How it works

Very simple, download the App from the App Store or Google Play and login! Forget traditional remote access models. We have developed a one way, scheduled reporting system, that gives you secure access on your own device, anywhere. Data is volunteered from the manufacturing side using email or FTP to our encrypted hosting platform. Remote devices (Androids,iOS,Web) connect through an easy to install App.

Traditional Model

Peak42 Model

Scheduled & secure on mobile devices
